Federal District Court Judge Hanen of the Southern District of Texas issued a decision against DACA.

What this means:

- If you have DACA, you are still protected. Individuals with DACA can continue renewing their DACA and work permit for the time being.

- Advance Parole also remains in place for the time being.

- Unfortunately, this decision continues to deny DACA to new applicants by not permitting initial applications to be decided.
“Our students deserve to live without fear. They deserve permanent protection. Congress must stop playing games with the lives of DACA recipients. The Biden Administration and Congress must deliver citizenship for our students and their families.”
